

Excellence in education

Recognized worldwide for its high quality education and classroom instruction, the French educational system allows your children to develop and give the best of themselves.

The success of your children and their personal development is our foremost concern and we carefully recruit competent teachers for them from the best.

Together with French, **English language instruction is also provided** from a young age and graduates from the school are fluent in at least these two languages.

The security and the development of your children are our priority. The school has been evaluated by French and British Embassy security experts and is classified **among the most secured schools** in Dhaka.

Everywhere in the world you will find a French school following these programs and offering a quality education, part of a **network of more than 620** schools and high schools.

This network will provide your children with a **quality education supporting access to major universities** throughout the world.

We welcome children from the age of 2.5 years until completion of their high school baccalaureate (equivalent IB).

Toddlers are welcomed **in a secure environment** adapted to their development and **evolve in a serene atmosphere.**

High school students enter into the CNED system, an organization administered by the French national education authority. Competent and qualified teachers **follow step by step** the education of the children to ensure the success of all.

Our teachers are university degree holders and follow the new programs of the French national education system as revised in September 2016.
